SUMMARY

5+ years in business development, marketing and growth. I design and build the internal systems that connect marketing, sales and operations: operating systems for teams, lead capture and follow-up, Business Intelligence dashboards, and AI automation. I start from how a team actually works, build in stages on real work, and hand over with training and a written guide.

CORE EXPERTISE

- Internal operating systems (tasks, reviews, reports, HR)
- Lead capture, scoring, assignment & follow-up
- BI dashboards & KPI design
- Workflow automation (n8n, Make, Zapier)
- RAG assistants that answer from company files only
- Business development, GTM & competitor analysis
- Performance marketing, content & brand strategy
- Process design: roles, ownership, escalation

SELECTED SYSTEMS

Marketing Agency Operating System — marketing agency, Egypt · designed and built solo · live in production

One app for the agency's day-to-day: daily reports tied to clients and tasks, tasks with review stages and automatic escalation, a transparent performance formula, a client assistant that answers only from each client's knowledge base, automatic Drive folders, and HR with forms. Role-based access enforced in the database, and a full change log.

21 daily users · 65 clients · 48 screens · 13 automated jobs (measured 19 Sep 2026)

React, TypeScript, TanStack, Supabase/PostgreSQL, Edge Functions, Gemini/Claude, Google Drive API, PWA

Legal RAG Knowledge System — law office, Saudi Arabia

An assistant that answers from the office's own documents, so research starts from the right source.

Sky Leads — lead management — real estate, Egypt

Every lead captured instantly, scored by AI, routed to the right salesperson, and reassigned automatically after 24 hours without a reply.

Marketing Operating Model — content operations

Brand messaging system, weekly content cycle, and AI helpers for strategy, copy and design.

AI Recruitment & Financial Dashboard systems

Competency matrix with AI CV screening and automatic scheduling; AI extraction of financial data into a live executive dashboard.

EXPERIENCE

AI Business Development & Operating Systems Consultant

2+ years

Freelance — Cairo, Egypt

- Designed and built AI-integrated operating systems for companies across marketing, legal, commercial and operational environments, including clients in Egypt and Saudi Arabia.

Business Development & Growth Lead

3 months

Cloudilic | Dragify.ai — Cairo, Egypt

- Led market validation of an AI automation platform for marketing, sales and operations; mapped monetizable automation scenarios from real customer pain points.
- Contributed to early pricing and go-to-market logic; ran customer discovery and bridged business and technical teams.

Business Developer & Account Manager

6 months

KMF Agency — Cairo, Egypt

- Generated new business and designed inbound and outbound acquisition frameworks; structured CRM reporting for opportunity visibility.
- Managed client accounts with a focus on retention and upsell.

Business Developer

6 months

Point Trade — Cairo, Egypt

- Competitor analysis across the market to identify expansion gaps; aligned marketing and sales priorities and introduced structured lead follow-up.

Marketing & Growth Specialist

6 months

CMG Holding — Cairo, Egypt

- Ran multi-channel campaigns and improved funnel visibility and reporting for management.
